

GRÉGORY CAPON

ROBOTICS & ARTIFICIAL INTELLIGENCE ENGINEER

Specialising in computer vision — available as soon as possible

+33 6 47 02 03 90
capongregory68@gmail.com
Full driving licence (B) / Own car
Mobile in France and abroad

PROFILE

Early-career engineer in robotics and artificial intelligence, specialising in computer vision. Three consecutive internships in applied AI have allowed me to build and deploy end-to-end computer vision pipelines: dataset creation, training, optimisation and production deployment. Autonomous, self-taught and committed, I am looking for a first role in robotics and/or vision AI, in France or abroad.

SKILLS

Programming & tools: Python (fluent, used in production across 3 internships), C, C++ (academic foundations), Git, Linux/Windows
AI / Computer vision: computer vision, deep learning, data augmentation and labelling, hyperparameter tuning, model optimisation
Robotics: ROS2 basics (academic training, not yet used in a professional setting), industrial robotics (FANUC and Stäubli robot programming), basic electronics

EXPERIENCE

AI Engineer Intern Mar 2026 – Aug 2026
***NGX Group — Mérignac, France**. computer vision anomaly detection on fencing installations, replacing an unreliable existing solution*

- Took over an existing project whose results were judged insufficient (YOLO model producing a high false-positive rate)
- Researched and evaluated alternative technical solutions (detection and segmentation approaches)
- Built the dataset: data augmentation and labelling
- Inference time of about 200 ms (vs ~70 ms for the initial YOLO): a deliberate trade-off in favour of reliability, while remaining compatible with real-time use
- End-to-end Python development (data processing, training, evaluation)

AI Engineer Intern Jun 2025 – Aug 2025
***Wasoria — Le Creusot, France**. led an AI-based detection project*

- Python development of the solution
- Dataset creation and data augmentation
- Hyperparameter tuning and model optimisation

Engineering Intern Apr 2025 – May 2025
***ADProd — Annecy, France**. design of conversational robots*

- Python development
- Performance optimisation
- Electronic circuit design
- Oral presentations of the work

Logistics Employee (fixed-term contract) Jun 2024 – Jul 2024
Leclerc — Colmar, France

EDUCATION

Engineering Degree — Robotics and Instrumentation, mention très bien (highest honours) · Polytech Dijon 2021 – 2026
Master's in Artificial Intelligence (double degree) · UTM, Kuala Lumpur, Malaysia 2025 – 2026

PERSONAL ROBOTICS PROJECTS

- **FANUC Olympiads (Master's level)** — industrial robotics competition organised by FANUC: qualified for the finals
- **Awake Challenge** — design of a fully autonomous 1/10-scale vehicle: 2nd place out of 10 teams

LANGUAGES & INTERESTS

French — native | **English** — working proficiency (TOEIC 900, 6 months of study in Malaysia)
Interests: sport (individual and team), travel, discovering and learning, music
